

AI VALUE TRACE, PUBLIC_SECTOR

Data and compute sovereignty position

For A national sovereign cloud authority, 3 candidate paths to a named vendor capability.

PATH 01

BOARDOUTCOME
Data and compute sovereignty position

BUSINESSINITIATIVE
Sovereign cloud and AI compute build

OPERATINGMETRIC
Sovereign workload uptime in country

FUNCTION
IT and platform

AICAPABILITY
Agentic data fabric for sovereign AI

VENDORCOMPONENT
NetApp AFX exascale storage for AI

ACCOUNTABLE Chief AI Officer

REFRAMING QUESTION
If Chief AI Officer is the named accountable human for Data and compute sovereignty position, and Agentic data fabric for sovereign AI is delivered through NetApp AFX exascale storage for AI, what does the sovereign cloud and ai compute build initiative look like when Chief AI Officer cannot blame the vendor for the next miss?

81 /100 confidence

PATH 02 **79** /100 confidence

BOARDOUTCOME	BUSINESSINITIATIVE	OPERATINGMETRIC	FUNCTION
Data and compute sovereignty position	Sovereign cloud and AI compute build	Sovereign workload uptime in country	IT and platform
AICAPABILITY	VENDORCOMPONENT		
Agentic data fabric for sovereign AI	NetApp ONTAP native on AWS		

ACCOUNTABLE Chief AI Officer**REFRAMING QUESTION**

If Chief AI Officer is the named accountable human for Data and compute sovereignty position, and Agentic data fabric for sovereign AI is delivered through NetApp ONTAP native on AWS, what does the sovereign cloud and ai compute build initiative look like when Chief AI Officer cannot blame the vendor for the next miss?

PATH 03 **77** /100 confidence

BOARDOUTCOME	BUSINESSINITIATIVE	OPERATINGMETRIC	FUNCTION
Data and compute sovereignty position	Sovereign cloud and AI compute build	Sovereign workload uptime in country	IT and platform
AICAPABILITY	VENDORCOMPONENT		
Agentic data fabric for sovereign AI	Tanium XEM, converged endpoint management		

ACCOUNTABLE Chief AI Officer**REFRAMING QUESTION**

If Chief AI Officer is the named accountable human for Data and compute sovereignty position, and Agentic data fabric for sovereign AI is delivered through Tanium XEM, converged endpoint management, what does the sovereign cloud and ai compute build initiative look like when Chief AI Officer cannot blame the vendor for the next miss?
